

The Smile Investment Club

Make your life just that bit easier.....

.....here at The Burley Dental Suite, we want your experience to be as easy, relaxing and stress-free as possible. With our full range of dental treatments and facial rejuvenation treatments, there is something for everyone.

Maintaining good oral health is imperative if you want to keep your smile looking good, and that is why we recommend joining The Smile Investment Club. This is the best way for you to budget for your dental treatment, and regular visits throughout the year will help gain and maintain the optimum health of your mouth, teeth and gums. Prevention is definitely better than the cure...

Investment Level 1

This is our basic plan which entitles you to:

- 2 dental examinations and 2 basic hygiene sessions per year including all diagnostic digital x-rays.
- Free oral cancer screen, telephone advice, and **free assessment** of dental pain during practice opening hours.
- There is no joining fee; all you need to do is make a payment of **£10** per month which is set up as a standing order. By joining the plan, you will save £10 when compared to pay as you go throughout the year for your 2 exams and 2 hygiene sessions, and are able to budget regular small monthly payments rather than lump sum payments.
- You will also be entitled to **a free child place per adult patient** (child up to the age of 12) covering basic care.

Investment Level 2

This is the same as the basic plan above but **includes Dental Insurance**. This level is a good option for patients who have had veneers, bridges, crowns, implants or dentures. There is a one off £10 registration fee followed by affordable monthly payments of **£14**.

The Personal Investment Plan

Many of our patients may require or choose to have other treatments here at The Burley Dental Suite and this is why we also offer you **The Personal Investment Plan**. The benefits of this are:

- Tailor-made to your requirements and can include our Botox and filler treatments as well as dentistry.
- Before the plan is drawn up, you will have a free consultation with Dr Siddons to discuss the options available to you, or we can go through this at your exam if you would prefer.
- We will then give you a Personal Treatment Plan detailing the options discussed, the sequence of appointments you would need and a breakdown of costs. It is completely up to you which treatments you go ahead with, we are here to help, advise and support you.
- Finally we will invite you back to discuss the plan with Sam, our Practice Manager who can then schedule in your appointments over the 12 month period. She will calculate and confirm the total cost of treatment for you and advise you of the monthly payments to be made. We can then schedule in your appointments and begin your **Personal Investment Plan**. It really is that easy!
- Any work requiring external technicians i.e. veneers, crowns, bridges, dentures and implants will require a 50% deposit when this part of treatment commences and the remainder is added to your 12 month payment plan.

All plans are set up as a standing order. For more details, please call us on 01943 865600 or email office@theburleydentalsuite.com
