

We all want to look our best, and a great smile is top of many peoples list when it comes to looking good. Your smile is one of the first things someone notices about you. Over the years your teeth can lose their natural white colour as they become stained by smoking, coffee, wine and other substances. Fortunately there is a quick, easy and cost effective way to bring back your white teeth – ***Zoom advanced power.***

### ***What is Zoom advanced power teeth whitening?***

Zoom advanced power is a clinic based treatment. The procedure is simple, a hydrogen peroxide gel is applied to your teeth which is activated with the Zoom advanced power light.

- After 45 to 60 minutes your teeth are noticeably whiter.
- Immediate results with an average of 8 shades whiter
- Only one appointment required
- 73% less significant sensitivity over older teeth whitening methods
- Top-up trays included to enable you to maintain your whiter smile

### ***Zoom advanced power procedure***

The Zoom Advanced Power teeth whitening method is simple:

#### ***Step 1: Protection***

Our dentist or hygienists will prepare your lips and gums by applying a protective gauze and masking gel. These prevent the Zoom advanced power hydrogen peroxide gel from contacting your lips and gums.

#### ***Step 2: Preparation***

With only your teeth now exposed the hydrogen peroxide gel is applied thoroughly to your teeth.

#### ***Step 3: Teeth whitening procedure***

The Zoom advanced power system is then applied. The light source from the system activates the hydrogen peroxide gel to whiten your teeth. This procedure is completed up to four times until your teeth are the required shade.

#### ***Step 4: Completion***

Once your teeth are 8-10 shades whiter your teeth and gums are cleaned of all gels and we will provide you with a set of custom made trays to enable you to maintain your whiter teeth free of charge.
